

## 2021 PROSPECTIVE PRODUCT CONTENT LABEL <sup>1</sup>

3 Phases Green Electricity Product provides 14.25% of your electricity usage with new Green-e Energy certified renewable energy above and beyond California's mandated Renewable Portfolio Standard (RPS) renewable amount. The non-certified percentage of this product may not meet the Green-e Energy standard eligibility criteria on energy resource type, product specification disclosure requirements, and other rules concerning renewable energy defined by the Green-e Energy National Standard. However, 35.75% of your energy supply will meet the requirements for the California RPS. In 2021, the prospective content for 3 Phases Green Electricity Product will be as follows:

Green-e Energy Certified New <sup>2</sup> Renewables in 3 Phases Green Electricity Product		Generation Location
-Biomass	%	
-Geothermal	%	
-Low impact hydroelectric <sup>3</sup>	%	
-Solar	10.25%	CA, ID, NM and/or OR
-Wind	4%	CA, ID, WY and/or OR
-Total California Renewable Portfolio Standard amount (Non-Green-e certified)	35.75%	
<b>Total Green-e Energy Certified New Renewables</b>	<b>14.25%</b>	

1. These figures reflect the renewables that we contracted to provide. Actual figures may vary according to resources availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of electricity you purchased.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

3. Eligible hydroelectric facilities are defined in the Green-e Energy National Standard (<http://www.green-e.org/standard>) and include facilities certified by the Low Impact Hydropower Institute (LIHI) ([www.lowimpacthydro.org](http://www.lowimpacthydro.org)) or EcoLogo ([www.ecologo.org](http://www.ecologo.org)); and facilities comprised of a turbine in a pipeline or a turbine in an irrigation canal.

For comparison, the 2019 average mix of resources supplying in California includes: Coal (3.0%), Nuclear (9.0%), Natural Gas (34.2%), Large Hydroelectric (14.6%), Biomass (2.4%), Geothermal (4.8%), Eligible Hydroelectric (2.0%), Solar (12.3%), Wind (10.2%), Unspecified sources of power (7.3%) and Other (0.2%). This resource mix was prepared in accordance with California Energy Commission.

3 Phases Green Electricity Product is Green-e Energy certified, and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at [www.green-e.org](http://www.green-e.org).

For specific information about this product, please contact 3 Phases Renewables by phone at 310.939.1283, or at <https://3phasesrenewables.com/>

The remaining 35.75 % of electricity is not Green-e Energy certified. However, 29 % of your energy supply will meet the requirements of the California RPS.

2021 California Mandate Renewable Portfolio Standard (RPS) Resources		Generation Location
-Wind (RPS Mandated Renewables)	2%	CA, ID, WA, CO, WY and/or OR
-Small Hydroelectric (RPS Mandated Renewables)	3 %	CA
-Solar (RPS Mandated Renewables)	25.75%	CA, ID, and/or OR
-Biogas (RPS Mandated Renewables)	5%	CA
-Total (California RPS Power Mix)	35.75%
